

The Dynamics 365, JD Edwards and NetSuite Market Leaders

About Catch

Catch Resource Management was established in 1999 by a senior management team with extensive experience and professionalism gained from both recruitment and industry backgrounds.

Two decades later and our reputation in the market is testament to how we apply that experience to successfully match clients and candidates together. We guide and support candidates to find the best jobs and help our clients maximise the ROI for their enterprise software application.

Our NetSuite Service

The Oracle NetSuite Portfolio of Cloud based ERP solutions are becoming the 'go to' solution type for many of the World's largest organisations and Oracle NetSuite are continuing to lead the way with a solution that was written expressly for the cloud.

Catch are subject matter experts in recruiting NetSuite professionals, we are also an Oracle NetSuite Alliance Partner and assist with cross training resource to become NetSuite Certified Professionals. Our relationship with Oracle NetSuite means we have a continued interest in seeing the marketplace develop.

Catch can supply both permanent and contract NetSuite resources across all disciplines and modules.

Our Approach

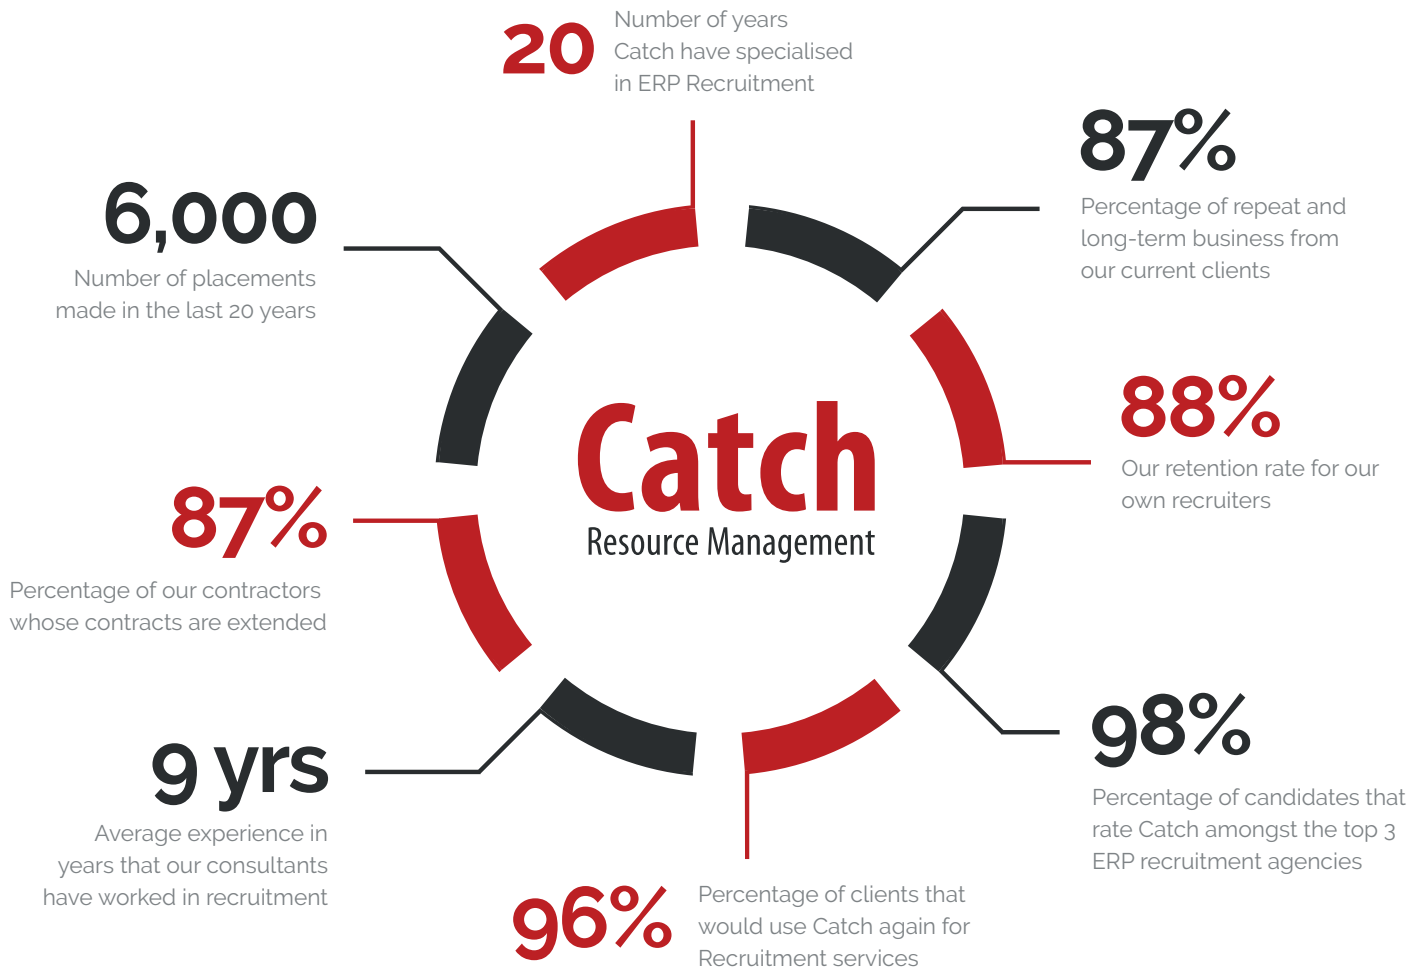

Catch's ongoing vision is to use years of expertise to transform the IT recruitment industry, helping to break the cycle of inefficient recruitment processes leading to the 'cut and run' attitude still adopted by some recruitment agencies.

Our whole team is focused on delivering a more skilful and often bespoke approach to this specialised area of resourcing. We believe that forging closer, longer-term relationships with both clients and candidates is more productive and rewarding for everyone.

- ✔ IT Directors / Managers
- ✔ NetSuite Functional Consultants
- ✔ NetSuite Developers and Technical Consultants
- ✔ NetSuite Programme, Project and Change Managers
- ✔ Data Migration
- ✔ NetSuite Business Analysts
- ✔ NetSuite Administrators
- ✔ NetSuite Sales and Pre-Sales
- ✔ Test Lead and Testers

We can also provide other bespoke services within your recruitment process, for example we can conduct pre-interviews, on-site interviews and perform psychometric and technical tests. We have an enviable track record of bringing the right balance of skill and personality to the interview table.

NOBLUE
CAROL MESSENGER

"One of the biggest challenges for us, when recruiting NetSuite resource, is finding an agency who will take the time to not only understand the brief, but also the company culture and, therefore, submit appropriate candidates who not only have the skills, but who also are a good fit for the business. I have found the NetSuite team at Catch to be very good in this respect, taking time to understand us, as well as the skillset required, and presenting really good interviewees. It saves a lot of hassle and heartache for both us and the candidates!"

NETSUITE CONSULTANT
AMIT VASUDEVA

"I have been working with Catch Resource Management for many years and they have twice helped me find suitable roles; the first was working with JD Edwards Software, the second time working with NetSuite which is my chosen career direction moving forward. The consultants at Catch are not only highly professional and efficient, they truly consult giving excellent career advice and direction. I would not hesitate to recommend Catch Resource Management to any IT professional looking for ERP or NetSuite career opportunities."

FUNCTIONAL LEAD
ROGER LAINÉ

"Catch provide a comprehensive package of administration and support, providing me with total confidence that everything will be handled in a timely manner, and providing professional advice, and effectively correcting any minor errors and omissions on my part, to ensure a smooth relationship with my clients."
