

## The Dynamics 365, JD Edwards and NetSuite Market Leaders

### About Catch

Catch Resource Management was established in 1999 by a senior management team with extensive experience and professionalism gained from both recruitment and industry backgrounds.

Two decades later and our reputation in the market is testament to how we apply that experience to successfully match clients and candidates together. We guide and support candidates to find the best jobs and help our clients maximise the ROI for their enterprise software application.

### Our JD Edwards Service

Catch specialises in resourcing the very best JDE professionals for some of the world's leading companies in the UK and Europe.

Undertaking client assignments on a contingent or retained basis, Catch has a large database of the best JDE candidates in the business.

In addition to our reactive resource services, Catch can provide strategic recruitment advice when, for example, teams are required to implement or support large UK or Pan European ERP projects.

**Catch can supply both permanent and contract JDE resources across all disciplines and modules.**

### Our Approach

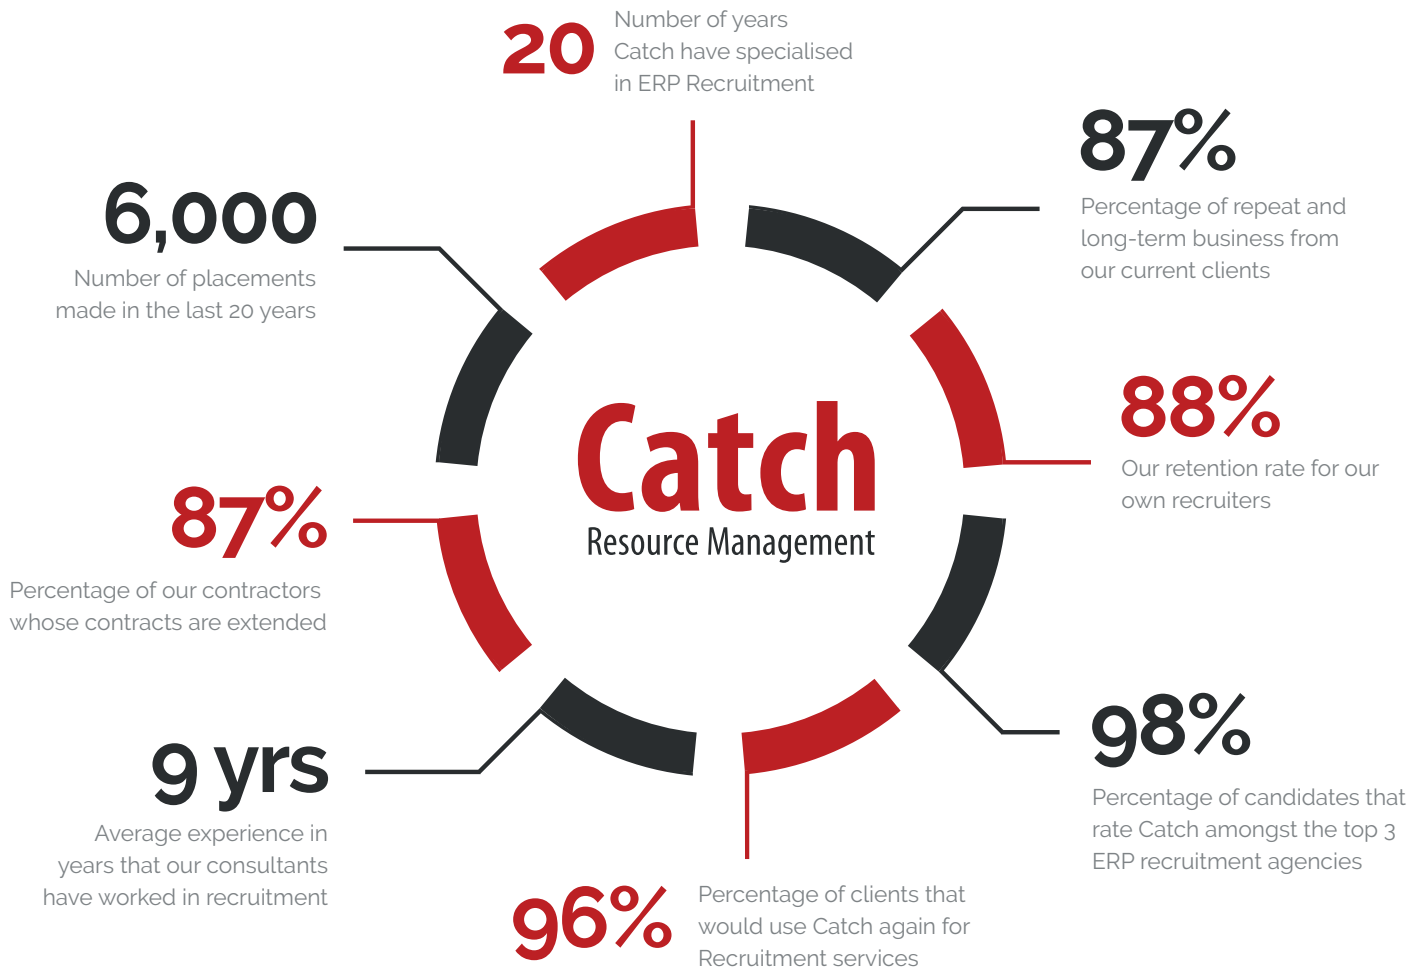

Catch's ongoing vision is to use years of expertise to transform the IT recruitment industry, helping to break the cycle of inefficient recruitment processes leading to the 'cut and run' attitude still adopted by some recruitment agencies.

Our whole team is focused on delivering a more skilful and often bespoke approach to this specialised area of resourcing. We believe that forging closer, longer-term relationships with both clients and candidates is more productive and rewarding for everyone.

- ✓ JDE Functional Consultants
- ✓ JDE Developers
- ✓ JDE Programme and Project Managers
- ✓ JDE Business Analysts
- ✓ Solution Architects
- ✓ System Accountants
- ✓ Finance System Managers
- ✓ JDE CNC Consultants
- ✓ JDE Support Analysts

We can also provide other bespoke services within your recruitment process, for example we can conduct pre-interviews, on-site interviews and perform psychometric and technical tests. We have an enviable track record of bringing the right balance of skill and personality the interview table.

**LEADING EUROPEAN MANUFACTURER**  
**TOINE SIEMERINK**

*"I had a number of open positions to fill. For JD Edwards (JDE) we had a hard time in finding the right candidates that fitted our needs ourselves and that's where Catch helped us out. Since the pool of qualified and experienced JDE resources is very limited, that to me shows that Catch is able to 'find the needle in the hay-stack' and really persists."*

**JDE SYSTEMS MANAGER**  
**DAMIEN MARSH**

*"I was recently placed by Catch into my current position and I have to say the whole experience of working with them was excellent from start to finish. The "no pressure" approach was really nice. This led me to talk openly about my career and where I wanted to position myself in the future. Upon deciding to pursue the role, I felt informed at every stage, with honest feedback being given about the position and my own expectations. If I'm ever looking for another opportunity I will definitely contact Catch first."*

**JDE APPLICATIONS SUPPORT ANALYST**  
**NIKOLAY NEDELICHEV**

*"I encountered Catch when I was looking for new job opportunities. They are very knowledgeable Recruitment Consultants specializing in the field of JD Edwards ERP. Their experience knows no national boundaries as they are able to guide and connect me with employers across different Countries and industries."*
